NOTICE OF GROUND OF REJECTION

Applicant : Mitsubishi Denki Kabushiki Kaisha
Attorney : First Law Offices of Korea
Pat. Appln. No. : 10-2001-0058570
Title of the Invention : Semiconductor Device and Manufacturing Method of
the Same

This is to notice, under the provision of Article 63 of the Patent Law, that the grounds for rejection as specified below are found as a result of examination of the present application. If the applicant has any argument or wishes to make amendments, please file a response or an amendment by October 27, 2003. (The due date is extensible one month at a time. Any notification acknowledging such extension will not be issued.)

Grounds

The invention as specified by the claims 1 and 2 of the present application could have been readily made by a person skilled in the art before the filing of the present application from the references specified below. Accordingly, a patent cannot be granted thereto under the provision of Paragraph 2 of Article 29 of the Patent Law.

Remarks

Claims 1-2 of the present application is directed to a semiconductor device and a method of manufacturing the same, wherein a surface of an active region of a semiconductor substrate is entirely rounded so as to be inclined downward toward an isolation region of a bird's beak. Impurities are implanted into the active region through a first insulating film and a bird's beak portion, and after the first insulating film is removed, a gate electrode is formed with a second insulating film interposed. The invention in Cited Reference 1 (Korean Patent Laying-Open No. 1993-9059) discloses a method of forming a semiconductor device including an active region having a rounded surface and being inclined toward an element-isolating film (Fig. 2). The invention in Cited Reference 2 (Japanese Patent Laying-Open No. 2000-200878) discloses a method of manufacturing a semiconductor device, including implanting an impurity for threshold voltage onto an insulating

film on an active region that is entirely rounded over a sharp portion of a surface of a semiconductor substrate, followed by a subsequent step (Figs. 16-25). The present invention could easily have been made by those having ordinary skills in the art in view of the inventions in Cited References 1 and 2.

Sir:

We are in receipt of the Notice of Allowance dated October 22, 2003.

In reviewing the file, it is noted that we have not received acknowledgement of the Information Disclosure Statement and cited art filed November 24, 2003. Enclosed are copies of the Information Disclosure Statement, PTO-1449 and stamped return postcard acknowledgement.

Applicant hereby respectfully requests that:

the appropriately acknowledged PTO-1449 be furnished to Applicant; and
the record be clarified to confirm that the cited art has been considered and made of record.

Respectfully submitted,
